

Grenoble, 8 July 2014

O/Re. DO/ Notification 14.0120 from 8 July 2014

**PURITY REQUIREMENTS RESPECT FOR
FOOD CONTACT APPLICATIONS**

Product: PM1 White Tissue Paper

This document is based on:

- The requirements on purity given by the following texts:
 - French Guide for good manufacturing practices of papers and boards and converted paper and board articles intended for food contact use
 - German BfR Recommendation XXXVIfor short contact with dry and/or fatty foodstuffs at room temperature
- The information on fibrous and non-fibrous composition and the normal and foreseeable conditions of use of the product, provided by SCA Tissue,
- The absence of substances subjected to specific migration limit declared by your suppliers
- The paper samples taken and provided by SCA Tissue, referenced "Essuyage blanc 18g (référence ST081013/Ti050096) du 22 avril 2014".

The received product was tested according to the standards methods for testing papers and boards intended to come into contact with foodstuffs and recommended by the texts above mentioned. The results of made analyses are presented in the test reports 14.0120/2 and 14.0120/3 issued from June 2014.

Moreover, a sensory test was carried out (see test report 14.0120/1): the median score 0 was obtained, that means that no irrelevant off-flavour was perceived.

Using the elements above mentioned, the purity criteria checked on the provided product can be considered in accordance with the requirements given by **French Guide for good manufacturing practices** and **BfR Recommendation XXXVI** for an end-use of the referenced product in contact with **dry and/or fatty foodstuffs** in normal and foreseeable conditions of use, short contact at room temperature.

The present notification is valid from 21st May 2014 as long as no modification comes to affect the elements according to which it has been established and this for 5 years maximum. It may be used for the writing of your declaration of compliance for food contact.
