

## Permeation von ausgewählten Chemikalien

<b>Produkt:</b>	Peha-soft nitrile fino
<b>Produktyp:</b>	qualifiziert als Untersuchungshandschuh, latexfrei, puderfrei, unsteril
<b>Datum:</b>	17.06.2011

Auf der Grundlage der Permeation von ausgewählten Chemikalien (alle Tests wurden von einem akkreditierten Labor oder dem Hersteller gemäß EN 374-3 durchgeführt), wurden folgende, für den Peha-soft nitrile fino typischen Ergebnisse, festgestellt:

Chemikalie	Leistungsniveau / Schutzindex	Durchdringzeit [min]*
Ammoniak 25%	0	< 5 Minuten
Chlorhexidin 4%	6	> 480 Minuten
Chloroform	0	< 5 Minuten
Cyclohexan	1	> 10 Minuten
Cyclohexanol (Hexalin)	2	> 30 Minuten
Dichloroethan	0	< 5 Minuten
Essigsäure 10%	3	> 60 Minuten
Ethidiumbromid, gesättigt	6	> 480 Minuten
Ethylalkohol 70%	0	3 Minuten
Ethylalkohol 80%	0	1 Minute
Formaldehyd 35%	4	> 120 Minuten
Glutaraldehyd 10%	6	> 480 Minuten
Heptan	1	> 10 Minuten
Hexan	0	10 Minuten
Natriumhydroxid 40%	6	> 480 Minuten
Salzsäure 25%	6	> 480 Minuten
Schwefelsäure 50%	6	> 480 Minuten
Toluol	0	< 5 Minuten

\*Hartmann möchte Sie darüber in Kenntnis setzen, dass die Dauer des Schutzes unter Arbeitsbedingungen beträchtlich von dem Schutzlevel, welches in Permeationstests unter Laborbedingungen mit gleich bleibenden Bedingungen festgestellt wurde, abweichen kann. Vor der Nutzung sollten Sie bitte unbedingt die Handschuhe auf physische Schäden untersuchen.

Auf der Grundlage der Permeation von ausgewählten BODE Desinfektionsmitteln (alle Test wurden von einem akkreditierten Labor gemäß EN 374-3 durchgeführt), wurden folgende, für den Peha-soft nitrile fino typischen Ergebnisse, festgestellt:

BODE Desinfektionsmittel	Leistungsniveau / Schutzindex	Durchdringzeit [min]*
Bacillol AF	0	6 Minuten
Bomix 1%	6	> 480 Minuten
Dismozon pur 1%	6	> 480 Minuten
Kohrsolin FF 0.5%	6	> 480 Minuten
Kohrsolin extra 0.5%	6	> 480 Minuten
Korsolex extra 4%	6	> 480 Minuten
Korsolex plus 3%	6	> 480 Minuten
Korsolex med AF 1%	6	> 480 Minuten

Dieser Handschuh ist ein Medizinprodukt (EN455), welches nicht als persönliche Schutzausrüstung qualifiziert ist (EN374). Bitte bedenken Sie, dass die Verwendung von Produkten, welche als persönliche Schutzausrüstung akkreditiert sind, für bestimmte Arbeitsfelder als ordnungsgemäßer Schutz des Anwenders vorgeschrieben sind.

\*Hartmann möchte Sie darüber in Kenntnis setzen, dass die Dauer des Schutzes unter Arbeitsbedingungen beträchtlich von dem Schutzlevel, welches in Permeationstests unter Laborbedingungen mit gleich bleibenden Bedingungen festgestellt wurde, abweichen kann. Vor der Nutzung sollten Sie bitte unbedingt die Handschuhe auf physische Schäden untersuchen.

## Prüfbericht A 10 1228

### 1. Ausfertigung

Auftraggeber : Paul Hartmann AG  
Paul-Hartmann-Straße 12  
89522 Heidenheim

Auftrag über : Prüfung von Handschuhen aus Nitril;  
Prüfung gemäß DIN EN 455-1:2001-01 und DIN EN 455-2:2010-04

Bestell-Nr. : 4541281053 Auftrag vom : 27.07.2010  
T02/TV

Prüfgut : 700 anatomisch geformte Untersuchungshandschuhe aus Nitril (Größe M) der Marke „**Peha-soft nitrile Fino**“ aus der Charge 002301006.  
Die Handschuhe sind verpackt in 7 verschlossenen Kartons mit je 100 Handschuhen Inhalt.  
Das Prüfgut wird mindestens 3 Monate aufbewahrt und anschließend entsorgt.

Prüfgutentnahme : Vom Auftraggeber vorgelegt

Prüfgeuteingang : 26.07.2010

Prüfzeitraum : 05.08.2010 bis 23.08.2010

Staatliche Materialprüfungsanstalt Darmstadt  
Kunststoffe / Medizintechnik  
Grafenstraße 2, 64283 Darmstadt

### Prüfrichtlinie

DIN EN 455-1:2001-01 und DIN EN 455-2: 2010-04

### Ergebnisse

Die Befunde sind in der obigen Tabelle aufgeführt.

### Beurteilung

Das vorgelegte Prüfgut **entspricht** den Forderungen der Prüfrichtlinie

Anmerkung: Eine verschlossene Packung enthielt 103 Handschuhe, eine weitere Packung ent-  
hielt 101 Handschuhe und 3 Verpackungen enthielten jeweils 102 Handschuhe.

## Technical Report

Subject: EN 420: 2003, EN 388: 2003 & EN 374-2: 2003 TESTING OF GLOVES  
REFERENCED “PEHA SOFT NITRILE FINO”  
Our Ref: SPC0181015/0951/17  
Date: 5th March 2010

### Conditions of Issue:

This report may be forwarded to other parties provided that it is not changed in any way. It must not be published, for example by including it in advertisements, without the prior, written permission of SATRA.

Results given in this report refer only to the samples submitted for analysis and tested by SATRA. Comments are for guidance only.

Tests marked †fall outside the UKAS Accreditation Schedule for SATRA. All interpretations of results of such tests and the comments based upon them are outside the scope of UKAS accreditation and are based on current SATRA knowledge.

**A satisfactory test report in no way implies that the product tested is approved by SATRA and no warranty is given as to the performance of the product tested. SATRA shall not be liable for any subsequent loss or damage incurred by the client as a result of information supplied in the report.**

The uncertainty of the results in this report is based on a standard uncertainty multiplied by a coverage factor k=2, which provides for a confidence level of approximately 95%.

Report signed by: P J Doughty  
Position: PPE Technologist  
Department: Safety Product Centre

## WORK REQUESTED:

We received samples of gloves referenced "Peha soft nitrile fino" on 14 December 2009 for testing in accordance with EN 420: 2003, EN 388: 2003 & EN 374-2: 2003.

## CONCLUSIONS:

Test / Property	Results Achieved
EN 420: 2003 Clause 5.1 Length & Fit	FAIL, see Note 1
EN 420: 2003 Clause 5.2 Dexterity	Level 5
EN 388: 2003 6.1 Abrasion resistance	Level 0, see Note 2
EN 388: 2003 6.2 Blade cut resistance	Level 0, see Note 2
EN 388: 2003 6.3 Tear resistance	Level 0, see Note 2
EN 388: 2003 6.4 Puncture resistance	Level 0, see Note 2
EN 374-2: 2003 5.2 Air Leak Test Method	PASS
EN 374-2: 2003 5.3 Water Leak Test Method	PASS

Note 1: As these gloves **fail** to meet the minimum length requirements specified in Table 1 of EN 420: 2003, the standard requires that the manufacturer shall clearly state in the user instructions the intended application of the gloves and the reason why the gloves do not conform with the minimum length requirements

Note 2: A visual inspection of the gloves was made on arrival and considered to only achieve a level 0 status. Therefore a deviation to the standard was made to only test one sample so if a level 0 was achieved that result was taken to be final and no further samples were required.

## TESTING:

Testing was carried out in accordance with EN 420: 2003, EN 388: 2003 & EN 374-2: 2003 between 2<sup>nd</sup> & 5<sup>th</sup> March 2010

Report by: Dan Harrison

## RESULTS:

Figure 1 – Photograph of gloves referenced “Peha soft nitrile fino”

### EN 420: 2003 Requirements

Glove size	6	7	8	9	10	11
Minimum length (mm)	220	230	240	250	260	270

Performance level	1	2	3	4	5
Diameter of dexterity pin (mm)	11.0	9.5	8.0	6.5	5.0

### EN 388: 2003 Requirements

Performance Level	1	2	3	4	5
6.1 Abrasion resistance (cycles to failure)	100	500	2000	8000	N/A
6.2 Blade cut resistance (minimum cut resistance index)	1.2	2.5	5.0	10	20
6.3 Tear resistance (lowest peak force – newtons)	10	25	50	75	N/A
6.4 Puncture resistance (lowest peak force – newtons)	20	60	100	150	N/A

### EN 374-2: 2003 Penetration Requirements

## TERMS AND CONDITIONS OF BUSINESS

### 1. GENERAL

Work done or services undertaken are subject to the terms and conditions detailed below and all other conditions, warranties and representations, expressed or implied are hereby excluded.

### 2. PRICES

Prices are based on current material and production costs, exchange rates, duty and freight and are subject to change without notice.

### 3. DELIVERY ESTIMATES

Delivery estimates are made in good faith and date from receipt of a written order and full information to enable us to proceed. While SATRA or its subsidiaries (hereafter referred to as "SATRA") make every effort to fulfil them, such estimates are subject to unforeseen events and if not maintained, cannot give rise to any claim. Offers "ex stock" are subject to prior sale.

### 4. CANCELLATION AND RETURNS

Cancellation of orders for goods, services, training or consultancy is only acceptable by prior agreement of SATRA and a charge will normally be made.

### 5. CLAIMS

Claims for errors, shortages etc should be notified within 10 days of date of receipt. In the event of goods damaged in transit, packing materials should be retained for examination; otherwise no liability can be accepted.

### 6. PAYMENT TERMS

Payment terms are net 21 days from date of invoice. Failure to comply with the terms of payment may result in delayed delivery of goods and services and a review of the Customer's credit account. Should the customer become subject to an administration order, or becomes bankrupt or goes into liquidation, SATRA has a right to cancel any contract and discontinue any work. SATRA reserves the right to adjust US Dollar and Euro sales price where customer exceeds credit terms and where the exchange rate has moved more than 10% since invoicing.

### 7. RETENTION OF TITLE

All goods remain the property of SATRA until paid in full. Under no circumstances will a customer's purchase order override our Retention of Title clause. In the case of software, the ownership of the software remains with SATRA. Payment of invoices in full will entitle the customer to use the software under licence until (a) they cease to be a member of SATRA or (b) they cease trading. In both instances, the licence shall then revert to SATRA.

### 8. GUARANTEE

All goods manufactured by SATRA are guaranteed both as regards material and workmanship. Any part returned carriage paid, within twelve months from date of supply and found defective, will be repaired or replaced at SATRA's option free of charge. SATRA admits no liability for loss, damage or delay consequent on any defect in any goods supplied by SATRA.

### 9. TEST REPORTS

Results given in test reports refer only to samples submitted for analysis and tested by SATRA. A satisfactory test report in no way implies that the product tested is approved by SATRA and no warranty is given as to the performance of the product tested. SATRA shall not be liable for any subsequent loss or damage incurred by the client as a result of information supplied in a test report.

### 10. TEST SAMPLES

Unless otherwise agreed in advance, test samples will be disposed of 6 weeks after the date of the final report. If required, samples can be returned at the Customer's expense.

### 11. RESPONSIBILITY

Every effort is made to ensure accuracy in description, drawings and other information in correspondence, catalogues, etc but no warranty is given in this respect and SATRA shall not be liable for any error therein. SATRA carries out all tests and/or advises only on the basis that the same are carried out, made or given without any responsibility whether for negligence or otherwise. SATRA and its servants or agents will not be liable for any damage or loss direct or indirect of whatsoever kind, whether or not the same results directly or indirectly from negligence on the part of SATRA or its servants or agents.

### 12. CONFIDENTIALITY

Unless specifically excluded in the terms of an individual contract between SATRA and its Customer, the following shall apply to all reports, advice, drawings, photographs, specifications or data:

- i. The above shall not be disclosed to third parties or used in litigation without the consent of SATRA.
- ii. Where SATRA has given consent to disclosure, the Customer shall draw the attention of the third party to these terms of business and the basis on which SATRA undertakes test, reporting and advising. The Customer shall indemnify SATRA for any failure to do so.
- iii. The above items are submitted to the Customer as confidential documents. Confidentiality shall continue to apply after completion of the business, but shall cease to apply to information or knowledge which may come into the public domain.

### 13. CONSTRUCTION AND ARBITRATION

The laws of England shall govern all contracts and the parties submit to exclusive jurisdiction of the courts of England, unless otherwise agreed.
