

Grenoble, 11 July 2011

O/Re. DO/ Safety Certificate from 7/07/2011

**SAFETY CERTIFICATE FOR  
FOOD CONTACT APPLICATIONS**

**Product: TISSUE PM2 FOR FOOD CONTACT APPLICATION**

This certificate is based on:

- The requirements on composition and on purity given by the following texts: **French Guide on Good Manufacturing Practices for the manufacture of paper and board materials** and **General Policy Statement concerning Tissue paper Kitchen towels and napkins** from Council of Europe,
- The composition, enclosed with this certificate, and the normal and foreseeable conditions of use of the product, provided by SCA TISSUE France,
- The respect of the specific restrictions of use concerning non fibrous raw materials by SCA TISSUE France,
- The safety certificates of all the constituents declared, given by your suppliers,
- The sample taken and provided by SCA TISSUE France, referenced "**Tissue for food contact application, ST081300, TI 068054, 20.5 g/m<sup>2</sup>**".

The product was tested according to the standards methods for testing papers and boards intended to come into contact with foodstuffs and recommended by the regulation texts above mentioned. The analysis results are presented in the test reports 11.0854/2.1En and 11.0854/3En issued from June-July 2011.

Using the elements above mentioned, we certify that the criteria of composition and purity are respected for an end-use of the product above mentioned in contact with dry, wet and/or fatty foodstuffs in normal and foreseeable conditions of use, for short contact less than 2 hours.

Moreover, an off-flavour test was carried out: the results are given in the test report 11.0854/1En; their exploitation comes under SCA TISSUE France responsibility such as the declaration of compliance of the product that SCA TISSUE France has to make available.

The present certificate is valid from 8<sup>th</sup> June 2011 as long as no modification comes to affect the elements according to which it has been established, and this for 5 years maximum.
